DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 4, 2007 has been entered. The previous rejection is withdrawn pursuant thereto.

2. Claims 1-42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mikurak, US 7,124,101.

Mikurak discloses, e.g. Figs. 1-143 and associated text, a system for managing relationships between a first party, e.g. customer, and a second party, e.g. vendor/brokers, at least one processor, e.g. 2801, 13500, 13504, memory, e.g. 2804, 2806, random access memory (RAM), read only memory (ROM), 4620, and memory for controlling system dynamics, e.g. protocols and rules allocating trading priority and system responses to operative commands entered by brokers, managing distributor information, e.g. service level agreements (Figs. 17, 22-24, 26), 4704, 4710, a selling agreement, e.g. Figs. 128, 131, 13000, a special commission structure, e.g. col. 286, lines 5-10, and a proper commission computation using order variables, e.g. col. 290,

lines 35-59, business rules, e.g. Fig. 67, and a license agreement, e.g. 6408. Mikurak does not disclose a licensing module, an appointment a commerce configuration engine. However, licensing modules and appointments to determine commission amounts are common knowledge in the licensing and transaction art. To have provided the licensing agreement to have incorporated a licensing module and appointments to determine commission amounts would have been obvious to one of ordinary skill in the art, as would have been using a commerce configuration engine to be determined by business rules.
